

No war on Ukraine

March 2022

This appeal was drafted after some informal discussion among anti-war activists, concerned at the small size of the anti-war protests against Russia's invasion of Ukraine. It aims to establish the central principles around which the broadest possible anti-war activity can be built.

"Massive demonstrations against war and in solidarity with the Ukrainian people all over Europe have not so far been matched in the UK, where protests have been small and often divided. We appeal to the entire Labour and trade union movement, pacifists, faith leaders, humanitarians, antiwar activists, those in solidarity with the Ukrainian people and all right-minded internationalists to build the broadest possible movement around three central demands:

- Russian troops out of Ukraine!
- No to war!
- Refugees welcome here!"

All signatories:
